1). In your opinion, what are the easiest ways to save and make money?

Answer: For starters, you could always live a frugal lifestyle, control your ego and shop wisely among other things. Even renting out a room in your home or office, lowering your insurance premiums, having a side hustle and starting or expanding a business can help. Of course, I'm always available for financial guidance. Trust me, I have a lot of ideas that are proven to work in the real world.

2). Do you have any advice for making money?

Answer: Besides controlling one's ego, I would say work smarter, not harder and let money work hard for you instead of the other way around. Of course networking or associating with the right people, businesses and organizations can help.

3). Is it true that money doesn't make people happy. I'm asking because I know you counsel people.

Answer: To give you an idea, I personally know millionaires who suffer from depression. And put this into perspective, several celebrities had committed suicide despite having fame and wealth. However, this isn't to say that obtaining more money wouldn't make people happy temporarily. In all, happiness lies within and could be influenced externally. And money could either make things easier or harder for you depending on the situation. And with and without money, people suffer.

4). I know you're an old soul, would you explain your money philosophy?

Answer: Besides being able to control my ego and live a frugal lifestyle, I understand the importance of money, it's like oxygen, you have to have it in order to survive. And on top of that, the lack of money enslaves you, but the question is "How much money is enough?" Just remember, there's more to life than materialistic things and money.
